

# Community Transport Wheelchair Accessible Vans

Providing optimal solutions for community  
accessible wheelchair conversions

**autoextras**  
group

At **Auto Extras**, we're passionate about helping people with a disability to enjoy maximum freedom and live their life to their fullest. For over 40 years, we've been helping organisations, families and individuals to maximise their mobility. We convert, service and lease a range of wheelchair accessible vehicles that fit the exact needs of organisations. Regularly working with and consulting to community transport organisations and aged care facilities, we understand transport requirements across a broad range of applications.

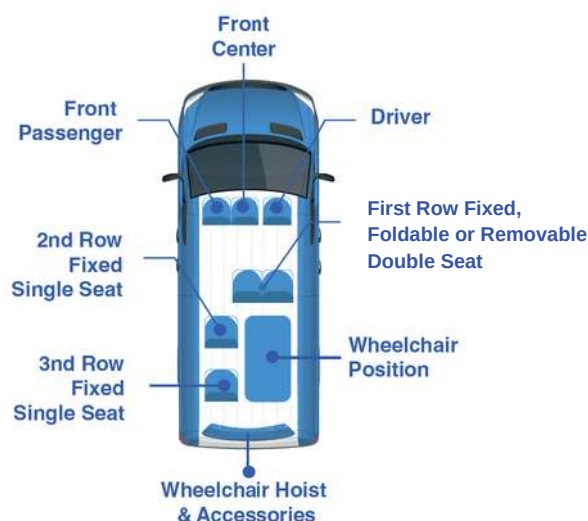

Typically based on an OEM 12-14 seat people mover van style vehicle, we provide multiple service offerings for both single and double wheelchair positions with multiple restraint styles and storage. We also provide a variety of options to retain or modify standard seating positions, access aids for door entrances with provision for additional vehicle accessories to suit individual organisation requirements. Ultimately resulting in a turnkey finished vehicle, ready for work and certified to Transport & Main Roads requirements.

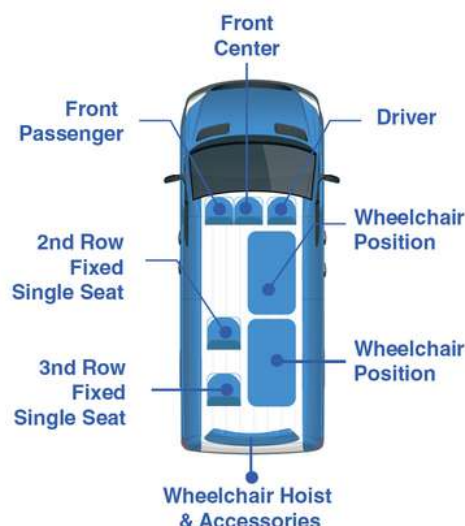

A variety of wheelchair hoists are available to be incorporated into your transport vehicle to suit every style and size wheelchair. Although a typical application is for a rear mounted hoist, options exist for side access via a sliding door with internal layout modelled accordingly:

Common 7 Seat Single plus Wheelchair Position  
(based on MWB Van - additional seating available in LWB vans)

Common 5 Seat Single plus 2 Wheelchair Positions  
(based on MWB Van - additional seating available in LWB vans)

**Optional Flip Up Double & Single Seats can also be utilised for extra / other seating positions as required.**

Single Side Fold Seat - Folded

Single Side Fold Seat - Opened
