

TRANSFER AIDS

KIVI ELECTRONIC TRANSFER PLATE

Vehicle mounted lifting board for safe vehicle transfers

The Electric Tip-up Plate is an aid used by people who find it difficult to transfer to the front passenger or driver's seating position.

As the transfer board is fixed onto the vehicle with a lifting column this reduced the safety risks involved with transferring and has a weight capacity of 100kgs.

The Electric Tip-up Plate incorporates the same function as the manual; however, it also has a lifting mechanism that allows you to transfer onto the plate and then, either lift or drop to the height of the seat in the vehicle to complete the transfer onto the seat.
